Situational Analysis		
Environmental Details	Situation Details	Other Details (optional)
EN06 - Rain (slippery road)	SD02 - High speed	
EN01 - Normal conditions	SD02 - High speed	
EN01 - Normal conditions	SD01 - Low speed	
EN01 - Normal conditions	SD02 - High speed	

Item Usage (function)	Situation Description	Function
IU01 - Correctly used	Normal Driving on City Road during Rain with High speed and correctly used system	Lane Departure Warning (LDW) function shall apply an oscillating steering torque to provide the driver with haptic feedback
IU02 - Incorrectly used	Normal Driving on Country Road during Normal conditions with High speed and incorrectly used system	Lane Keeping Assistance (LKA) function shall apply the steering torque when active in order to stay in ego lane
IU01 - Correctly used	Normal Driving on Country Road during Normal conditions with Low speed	Lane Departure Warning (LDW) function shall apply an oscillating steering torque to provide the driver with haptic feedback
IU02 - Incorrectly used	Normal Driving on Mountain Pass during Normal conditions with High speed and incorrectly used system	Lane Keeping Assistance (LKA) function shall apply the steering torque when active in order to stay in ego lane

Hazard Identification			
Deviation	Deviation Details	Hazardous Event (resulting effect)	Event Details
DV04 - Actor effect is too much	Lane Departure Warning (LDW) function applies an oscillating with high steering torque	EV00 - Collision with other vehicle	High steering torque can affect the driver ability to steer as intended
DV03 - Function always activated	Lane Keeping function is always activated	EV00 - Collision with other vehicle	Driver use the function as if the car was a self-driving car and loose driving attention.
DV03 - Function always activated	Lane Departure function is always activated	EV00 - Collision with other vehicle	The Lane Departure Warning always activated and executing random torque to the steering wheel making the driver to loose control with potential collision with other vehicle.
DV03 - Function always activated	Lane Keeping function is always activated	EV00 - Collision with other vehicle	Driver use the function as if the car was a self-driving car and loose driving attention.

Hazardous Event Description	Exposure (of situation)	Rationale (for exposure)
Lane Departure Warning (LDW) function applies an oscillating with high steering torque	E3 - Medium probability	city driving on highway during the rain should not happens too often
The driver does not use the function properly.	E2 - Low probability	country road driving at high speed and together with LKA should not happen often
The Lane Departure Warning acting randomly when the camera sensor is not working.	E3 - Medium probability	country driving is part of regular driving
The driver does not use the function properly.	E1 - Very low probability	mountain pass driving at high speed together with misusing system should not happen often

<b>Hazardous Event Classification</b>		
<b>Severity (of potential harm)</b>	<b>Rationale (for severity)</b>	<b>Controllability (of hazardous event)</b>
S3 - Life-threatening or fatal injuries	Collisions at high speed could cause fatal injuries.	C3 - Difficult to control or uncontrollable
S3 - Life-threatening or fatal injuries	Collisions at high speed could cause fatal injuries.	C3 - Difficult to control or uncontrollable
S1 - Light and moderate injuries	Collisions at low speed should not cause fatal injuries.	C3 - Difficult to control or uncontrollable
S3 - Life-threatening or fatal injuries	Collisions at high speed could cause fatal injuries.	C3 - Difficult to control or uncontrollable

	Determin
Rationale (for controllability)	ASIL Determination
It is difficult to stay calm and react properly when the steering wheel is steer too much	C
When the driver loose control of the vehicle it is very difficult to realize the situation and act accordingly	B
It is difficult to stay calm and react properly when the steering wheel is moving too much	A
When the driver loose control of the vehicle it is very difficult to realize the situation and act accordingly	A

ation of ASIL and Safety Goals
Safety Goal
<p>Lane Departure Warning (LDW) function should applies some restriction on using steering torque</p>
<p>The Lane Keeping Assistance (LKA) function shall be time limited, and additional steering torque shall end after a given time interval so the driver cannot misuse the system for autonomous driving</p>
<p>The Lane Departure Warning function shall be deactivated when the camera sensor stop working</p>
<p>The Lane Keeping Assistance function shall be time limited, and additional steering torque shall end after a given time interval so the driver cannot misuse the system for autonomous driving</p>

DV01 - Function not activated	Both headlights stop working

entification		
Hazardous Event (resulting effect)	Event Details	Hazardous Event Description
Front collision with obstacle	the obstacle with injury	Total loss of low beam

entification		
Hazardous Event (resulting effect)	Event Details	Hazardous Event Description
EV04 - Front collision with obstacle	Vehicle crashes into the obstacle with injury to driver	Total loss of low beam
EV04 - Front collision with obstacle	Vehicle crashes into the obstacle with injury to driver	Total loss of low beam
EV04 - Front collision with obstacle	Vehicle crashes into the obstacle or road infrastructure with injury to driver and any others present	Total loss of low beam
EV08 - Collision with other vehicle	Vehicle crashes into the oncoming vechile or road infrastructure	Total loss of low beam
EV04 - Front collision with obstacle	Vehicle crashes into the obstacle or road infrastructure with injury to driver and any others present	Total loss of low beam

Exposure (of situation)	Rationale (for exposure)
E4 - High probability	night driving in the city is a regular activity

Exposure (of situation)	Rationale (for exposure)
E4 - High probability	night driving in the city is a regular activity
E1 - Very low probability	night driving in the city on completely unilluminated roads while it is snowing is rare
E2 - Low probability	High driving is part of regular driving, however, heavy snow occurs a few times a year
E4 - High probability	country driving is part of regular driving
E2 - Low probability	country driving is part of regular driving, however, heavy snow occurs a few times a year

Hazardous Event Classification	
Severity (of potential harm)	Rationale (for severity)
S1 - Light and moderate injuries	In city traffic, speed of vehicle is expected to be low

Hazardous Event Classification	
Severity (of potential harm)	Rationale (for severity)
S1 - Light and moderate injuries	In city traffic, speed of vehicle is expected to be low
S1 - Light and moderate injuries	In city traffic, speed of vehicle is expected to be low
S3 - Life-threatening or fatal injuries	On highway speed of vehicle is expected to be high
S3 - Life-threatening or fatal injuries	On country roads speed of vehicle is expected to be high
S3 - Life-threatening or fatal injuries	On country roads speed of vehicle is expected to be high

Controllability (of hazardous event)	Rationale (for controllability)
C0 - Controllable in general	control the situation by applying brakes and there is additional illumination on city

Controllability (of hazardous event)	Rationale (for controllability)
C0 - Controllable in general	At city speed, most drivers will be able to control the situation by applying brakes and there is additional illumination on city roads
C1 - Simply controllable	On completely unilluminated city roads, drivers usually drive at lower end of city speeds and hence are expected to be able to control vehicle
C2 - Normally controllable	vehicles and there is some form of illumination on road and hence >90% drivers are able to brake and control the vehicle. And also use other forms of
C1 - Simply controllable	Since there is usually no other form of illumination to be expected on country road, it will be difficult for the average driver to control the vehicle in such a situation
C3 - Difficult to control or uncontrollable	Since there is usually no other form of illumination to be expected on country road, it will be difficult for the average driver to control the vehicle in such a situation

Determination of ASIL and Safety Goals	
ASIL Determination	Safety Goal
QM	Total Loss of Beam shall be prevented

Determination of ASIL and Safety Goals	
ASIL Determination	Safety Goal
QM	Total loss of low beam shall be prevented
QM	Total loss of low beam shall be prevented
A	Total loss of low beam shall be prevented
B	Total loss of low beam shall be prevented
B	Total loss of low beam shall be prevented

**Exposure**

ID	Description
E0	Incredible
E1	Very low probability
E2	Low probability
E3	Medium probability
E4	High probability

**Severity**

ID	Description
S0	No injuries
S1	Light and moderate injuries
S2	Severe and life-threatening injuries
S3	Life-threatening or fatal injuries

**Controllability**

ID	Description
C0	Controllable in general
C1	Simply controllable
C2	Normally controllable
C3	Difficult to control or uncontrollable

Duration (of situation)
Not specified
<1 % of average operating time
1 % to 10 % of average operating time
>10 % of average operating time

Remarks
No injuries
Light and moderate injuries
Severe and life-threatening injuries (survival probable)
Life-threatening injuries (survival uncertain), fatal injuries

Remarks
Controllable in general
99 % or more of all drivers or other traffic participants are usually
90 % or more of all drivers or other traffic participants are usually
Less than 90 % of all drivers or other traffic participants are usua

Frequency (of situation)	Reference
	E0 - Incredible
Occurs less often than once a year for the great majority of drivers	E1 - Very low probability
Occurs a few times a year for the great majority of drivers	E2 - Low probability
Occurs once a month or more often for an average driver	E3 - Medium probability
Occurs during almost every drive on average	E4 - High probability

Probability of Injuries	Reference
AIS 0 and less than 10 % probability of AIS 1-6	S0 - No injuries
More than 10 % probability of AIS 1-6 (and not S2 or S3)	S1 - Light and moderate injuries
More than 10 % probability of AIS 3-6 (and not S3)	S2 - Severe and life-threatening injuries
More than 10 % probability of AIS 5-6	S3 - Life-threatening or fatal injuries

	Reference
	C0 - Controllable in general
able to avoid harm	C1 - Simply controllable
able to avoid harm	C2 - Normally controllable
lly able, or barely able, to avoid harm	C3 - Difficult to control or uncontrollable
